

# LPD Finishing Guidelines

## Interior Doors

Although we don't demand that our *unfinished* products are finished using the Sikkens system, we stipulate that *only* the use of a treatment affording at least the same level of protection as provided by the Sikkens system constitutes an acceptable alternative and consequently, it is only in these circumstances that any *conditional* Guarantee can be offered.

Additionally, we can also confidently recommend Osmo Door Oil as a suitable finishing treatment, as it has been comprehensively tested by Osmo and is specifically recommended by them for use on internal engineered products.

## Exterior Doors

The same "guidelines" as detailed above for Interior doors apply to Exterior doors, notably that *only* the use of a treatment affording at least the same level of protection as provided by the Sikkens system constitutes an acceptable alternative and consequently, it is only in these circumstances that any *conditional* Guarantee can be offered.

Please note, in respect of Exterior doors, we do not recommend specific alternative products to Sikkens.
